PROFESSIONAL SUMMARY

UI/UX Designer with 4+ years of experience designing SaaS dashboards, web apps, and digital products for government, enterprise, and international clients. Combines design expertise (Figma, design systems) with front-end engineering (Vue, React, Tailwind CSS) — owning both design and implementation, so what ships matches the design and handoff rework is minimized. Top Rated on Upwork with 2,034 hours worked across 10+ international clients and \$10K+ earned. Product Owner of Fanplanner, a personal-finance PWA with 100+ active users and 10+ paying subscribers. Works with AI-augmented workflows (Claude, Cursor, Stitch) to accelerate research, design iteration, and code production.

WORK EXPERIENCE

UI/UX Engineer — Solusi247 (Contract)

Jakarta, Indonesia | May 2023 – Present

- Design and build dashboards and web apps for government and enterprise clients, including BMKG (Indonesia's national weather agency) products: Nowcasting and Dashboard Signature.
- Shipped the redesign of BMKG's public Nowcasting platform, now live nationwide — real-time weather monitoring across Indonesia with per-region forecast timelines and one-click PDF report exports.
- Translate client briefs into Figma designs, review with stakeholders, then slice approved designs into production code using Vue, Tailwind CSS, and Bootstrap 5.
- Cut miscommunication and handoff rework by working both sides — ensuring what FE/BE developers ship matches the design.
- Accelerate code production with AI-assisted tooling (Cursor) without compromising quality.

UI/UX Designer — Upwork (Freelance)

Remote | December 2024 – Present

- Maintain Top Rated status with 2,034 logged hours, 10+ international clients, and \$10K+ earned.
- Design dashboards and web apps across SaaS, healthcare, e-commerce, and internal tools — including Upvendo (European restaurant POS, live in 6+ restaurants in Belgium), Threadline (telehealth dashboard), and Benchtop (construction document platform).
- Speed up research, ideation, and prototyping with AI-assisted workflows.

Web Designer & UI Designer — PT Atask Teknologi Internasional

Jakarta · Remote | October 2024 – April 2025

- Owned the company homepage end-to-end as Web Designer — ran stakeholder research to define the flow and content structure, designed it, then built it as production code (HTML, Tailwind CSS 4, JavaScript).
- Designed mobile apps in Figma aligned with business workflows as UI Designer — built interactive prototypes and translated business processes into intuitive user flows.

UI/UX Designer — Fiverr (Freelance)

Remote | November 2024 – October 2025

- Delivered 20+ projects for 15+ startup and small-business clients — dashboard UI, web apps, and marketing sites — with structured UX thinking and pixel-precise execution.

UI/UX Design Intern — PrimeSkills (VR & AR)

Jakarta, Indonesia | March 2023 – August 2023

- Completed 5+ design projects for immersive VR/AR experiences — interface layouts, interaction flows, and usability improvements — through to implementation.
- Validated designs through usability testing with Maze and turned concepts into interactive prototypes.

FEATURED PROJECTS

- **Fanplanner — Personal Finance PWA** (Product Owner, 2026): designed, built, and shipped the product end-to-end in 3 months — effortless expense tracking through natural-language input and receipt scanning, multi-pocket balances, and clean Excel/PDF exports. Reached 100+ active users, 10+ paying subscribers, and 3 MVPs shipped. Live at fanplanner-app.com.
- **Nowcasting BMKG — Weather Dashboard** (UI/UX Engineer, 2026): redesigned BMKG's public weather-nowcasting platform from design through front-end build (Vue, Tailwind CSS) in 4 months — now live and publicly accessible nationwide.
- **Upvendo — Restaurant POS System** (UI/UX Designer, 2024–2026): designed a full-featured POS for European restaurants — transactions, automated reporting, marketing, and third-party delivery integrations — now live in 6+ restaurants in Belgium.
- **Threadline — Telehealth Dashboard** (UI/UX Designer, 2026, under NDA): designed an integrated clinician dashboard for session management, clinical documentation, and psychometric assessments over 5 months in an Agile team.

EDUCATION

- **Universitas Terbuka** — Associate Degree (D3) in Information Systems (2023 – 2027, in progress)
- **Universitas Jenderal Soedirman** — Associate Degree (D3) in Agribusiness, GPA 3.53/4.00 (2019 – 2022)

SKILLS

- **Design:** UI/UX Design, Design Systems, Auto Layout, Wireframing, Prototyping, Design Thinking, Usability Testing, Information Architecture
- **Design Tools:** Figma, Stitch, Claude Design
- **Front-End:** HTML, CSS, Tailwind CSS, JavaScript, Vue, React, Bootstrap 5
- **AI & Other:** Claude Code, Cursor, ChatGPT, Google AI Studio, Supabase

CERTIFICATIONS

- BuildWithAngga
Complete Web Designer with Figma (2023); Complete UI Design: Visual Design, Prototype, Usability Test (2022); Full-Stack Website Designer (2021)
- Dicoding — Basic JavaScript Programming (2022); Fundamental Front-End Web Development (2020); Basic Web Programming (2020), Belajar Dasar AI (2024), Belajar Dasar Pemrograman Web (2024)
- Google Developer Group — Partisipasi Juara Vibe Coding (2026)
